BEYERS BASIC MIXTURES

BEST VALUE FOR MONEY

The **BASIC** mixtures are affordable quality mixtures composed with grains and seeds selected by **BEYERS**, which have undergone the same fourfold cleaning process as all our other mixtures: purified separately twice before being mixed, after which the mixture goes through another cleaning process and finally the process is finished with a good brushing. The brushing of the grains results in a beautiful and naturally shiny mixture, without the need for oil to be added.
