

BEYERS CONDITION & CARE

SUPPORT

Grit and mineral mixtures are essential for optimal digestion and increasing the effectiveness of nutrient uptake from the feed through the grinding process in the gizzard. That is why we need to provide sufficient grit and minerals at all times of the year.

In addition, grits and minerals supply the pigeon with necessary building blocks such as minerals (calcium, phosphorus, magnesium, sodium, potassium and chlorine) and trace elements (iron, copper, manganese, zinc, iodine, selenium). Minerals and trace elements serve purposes such as developing muscles, bone structure, skin and feathers, and they play an important role in different processes in the body.

By feeding one or more of our perfectly balanced grit and mineral mixtures, you ensure that your pigeons have access to all the necessary minerals.

MULTI MINERAL MIX

ALL-IN ONE NUTRITIONAL SUPPLEMENT FOR PIGEONS : MINERAL MIX, SMALL SEEDS, VITAMIN MIX AND ENRICHED WITH ANISE SEED.

- Contains important raw materials, vitamins and minerals for a top condition throughout the year.
