

BEYERS CONDITION & CARE

SUPPORT

Grit and mineral mixtures are essential for optimal digestion and increasing the effectiveness of nutrient uptake from the feed through the grinding process in the gizzard. That is why we need to provide sufficient grit and minerals at all times of the year.

In addition, grits and minerals supply the pigeon with necessary building blocks such as minerals (calcium, phosphorus, magnesium, sodium, potassium and chlorine) and trace elements (iron, copper, manganese, zinc, iodine, selenium). Minerals and trace elements serve purposes such as developing muscles, bone structure, skin and feathers, and they play an important role in different processes in the body.

By feeding one or more of our perfectly balanced grit and mineral mixtures, you ensure that your pigeons have access to all the necessary minerals.

BELVIMIN

VITAMINISED MINERAL FEED

- Contains important building materials, vitamins (A, D3, B1, B2, E, PP and B12) and minerals to keep the pigeons in top condition throughout the year.
- Contains 25% calcium and 3% phosphorus to compensate for the shortage of calcium in grains and seeds in relation to the presence of phosphorus. That way, you achieve an optimal calcium/phosphorus ratio.
- Helps to prevent field poisoning.

Instructions:

- Mix a small quantity into the daily ration every day (maximum 10% of the daily ration).

Calcium	25,00 %
Phosphorus	3,00 %
Sodium	2,00 %
Lysine	0,00 %
Methionine	0,00 %
