THE QUALITY OF THE CHAMPIONS

BEYERS PREMIUM MIXTURES

THE QUALITY OF THE CHAMPIONS

From a quality point of view, the **PREMIUM mixtures are the supreme products within the BEYERS range**. The emphasis is on the **smaller** types of grain in the premium mixtures, like small Cribbs maize and small peas, in combination with toasted soya, in order to guarantee **optimal absorption of the grains**. Whoever opts for **PREMIUM mixtures** opts to never **throw money down** the drain again. **Plus the composition of these mixtures is of such high quality that we can refer to this as** optimally nutritious. This will allow you to get the very most out of your pigeons' qualities.

TOP MIXTURES AND COMPLEMENTARY PRODUCTS BY AND FOR PIGEON FANCIERS

BEYERS doesn't believe in working on its products for the pigeon market from the top of its ivory tower. Pigeon fanciers are employed at various different levels within the organisation, from production to sales and management and these people can perfectly empathise with modern pigeon racing experiences. Plus the company also boasts some very intensive working relationships with the absolute top of today's pigeon racing sport, both at home and abroad. Their feedback regarding their practical experiences with **BEYERS'** products allows us to continuously optimise the mixtures and complementary products

This intensive collaboration has led to the co-creation of a number of very high quality mixtures and supplements, suited to the vision of feed and the strategy of a number of top pigeon-fanciers. On the following pages, you will find the story about how each of these co-creations was developed. We present the specific characteristics of the mixture and/or supplement and tell you about the feed regime & strategy of the champion concerned.

PREMIUM PRANGE GRAND PRIX

GÜNTER PRANGE - A PHENOMENA WITHOUT STAR-LIKE AIRS!

Günter Prange is one of the absolute idols of German pigeon racing. During his career, he has won everything that was winnable from local to national levels. Moreover, Günter has won the German Golden Pigeon award eight times, joining the line of

(Beatrix Cock) crossed with a Koopman hen 'Daughter Sultana' with ring number NL94-2227959 was the foundation sire, a pigeon that went on to be the father of some top class pigeons, including the famous 'Ringlose No. 12.

stars with his six-times winner Jos Thoné (Belgium), and Kees Bosua (The Netherlands), who won four times.

Although Günter approaches pigeon racing by applying thorough thought to every aspect, he always strives for simplicity. That is why he wanted to find a basic mixture that he could use to feed his pigeons all year round, with just small amounts of supplements. He developed the mixture in collaboration with BEYERS and it markets this mixture under the name BEYERS PREMIUM PRANGE "GRAND PRIX". This mixture has become one of the most commonly used among many top class pigeon fanciers.

Anyone who challenges this former boxer in any sport will soon notice that Günter still has a big heart for sports, which he has expressed through his pigeons since ending his other sports career.

He founded his strain with Maurice Delbar pigeons crossed with Cornelis and Gerard Koopman birds. A son of the 'Beatrixdoffer'

FEEDING SCHEDULE – RACING SYSTEM GÜNTER PRANGE

The basic ingredients of the PREMIUM PRANGE GRAND PRIX mixture comprise small Cribbs maize, red dari and cardy (safflower). A striking factor of this mixture is its high proportion of hemp seed, at no less than 9%. Günter is a big fan of hemp seed, and he even adds extra during the breeding and racing season because it is rich-in-fat and has high protein content.

In periods in which pigeons have to invest less effort, Günter uses BEYERS ORIGINAL SUPER DEPURATIVE to make the mixture somewhat lighter.

In the racing season, at the beginning of the week he adds up to 50% ORIGINAL SUPER DEPURATIVE to his mixture. With the last two feeding rounds or the last two days before basketing, depending on the distance of the following race or whether the pigeons still need more fat or whether they still have to build reserves, he gives them extra hemp seeds after the feeding rounds. During breeding and for youngsters, Günter also gives his own mixture. During the breeding period, the pigeons may have unlimited access to an extra small feed silo, which is filled with hemp seeds. The breeding pigeons can consume these according to need.
