THE POWER OF ENZYMES

BEYERS offers a **unique range of mixtures**, to which **enzymes** have been added, with the **ENZYMIX** mixtures. These enzymes are **100% natural and completely tasteless and odourless**. The enzymes are not activated until after the feed has been ingested as a result of circumstances in the gullet and ensure the grains' cell walls are broken down more quickly. This allows the pigeons to absorb the nutrients more quickly and more efficiently.

The result of this is threefold: the pigeon gets considerably **more energy from the feed**, the **digestibility** from protein and crude fibre is considerably **higher** than results in traditional mixtures and better digestion results into noticeably **drier and less droppings**.
