PREMIUM JAN KEEN SUPERLIGHT

JAN KEEN - A LEADER IN ALL DISCIPLINES!

Like many pigeon lovers, **Jan Keen** caught the pigeon bug at a young age. It all started when he got some fancy pigeons that were given shelter on his father's farm.

The ornamental pigeons had a guest, a little lost pigeon with a ring. The flock of pigeons increased and Jan's father allowed him to convert a part of the chicken coop into accommodation for them. Jan's course was set.

In 1974, he moved to Ter Apel, his current residence, located on the Dutch-German border crossing, where he continued his pursuit of pigeon racing.

Jan has always been good at winning prizes. However, the foundations for his current successes were laid in 1995. In that year, following advice from **Staf Theeuwes**, he acquired pigeons from **Louis van Loon** (Poppel, BE). Buying those pigeons was a great success for Jan and his achievements improved in leaps and bounds from that moment onwards. In addition to the Loon pigeons, he successfully introduced others acquired from **Pol Bostijns** (Moorslede, BE), **Günter Prange** (Meppen, DU), **F & K Marien** (Tielen, BE) and other pigeons from some of the strong players among regional fanciers. This is a loft with breeders

that simply exude class. It would take too long to list all its achievements here. With NPO victories, several ace pigeons and numerous victories against thousands of pigeons, Jan became a leading fancier and a recognized name in Dutch pigeon racing.

In 1995, Jan turned his hobby into a profession, and started an animal supplies shop, specializing in pigeon racing articles, of course. So, it is not surprising that in 1998 Jan went into collaboration with **BEYERS** to develop his own special mix, **BEYERS PREMIUM JAN KEEN SUPERLIGHT**. This mix is characterized by its wide variety of highly nutritional but easily digestible seeds, and you can use it as an all-round basic mix in the sports season, on short sprint (vitesse), middle-distance, long-distance and overnight races.

BEYERS PREMIUM JAN KEEN SUPERLIGHT

- Top quality, versatile and easily digestible all-round sports mixture
- Program from sprint to distance

Ingredients: white sorghum, popcorn maize, white wheat, small cribbs maize, safflower, extra red sorghum, vetches, lentils, peeled oats, toasted soya, kadjang idjoe, brown rice, small green peas, maple peas, small yellow peas, buckwheat, paddy rice, winterpeas, hempseed.

Carbohydrates	56,7 %
Crude protein	13,7 %
Crude fat	5,9 %
Crude fibre	5,9 %
Crude ash	1,9 %

BEYERS ORIGINAL TRAPPING MIXTURE

- A versatile trapping mixture for pigeons.
- This mixture contains oil retaining and fatty seeds and grains and is the ideal supplement for pigeons during the racing season.

Ingredients: peeled oats, rapeseed, white millet, hemp seed, white seed, white dari, wheat, safflower, sesame seed, brown rice, extra red sorghum, katjang idjoe.

Carbohydrates	42,7 %
Crude protein	15,1 %
Crude fat	15,8 %

FEEDING PROGRAM – RACING SYSTEM JAN KEEN

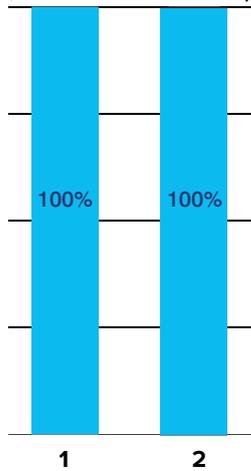

Jan only competes with cockerels in widowhood, for both programme and overnight racing pigeons. In Jan's opinion, they are more motivated because there is always a partner waiting for the pigeons in the flight when they come home to the loft. He does not enter the hen pigeons, not even in the 'after season' races (those held after the regular programme season). Since **PREMIUM JAN KEEN SUPERLIGHT** is an easily digestible mix, the pigeons have a feed at least 2-3 times a day. You add a grit and mineral mix to the feed 2-3 times a week.

NORMAL WIDOWHOOD – WIDOW COCKS

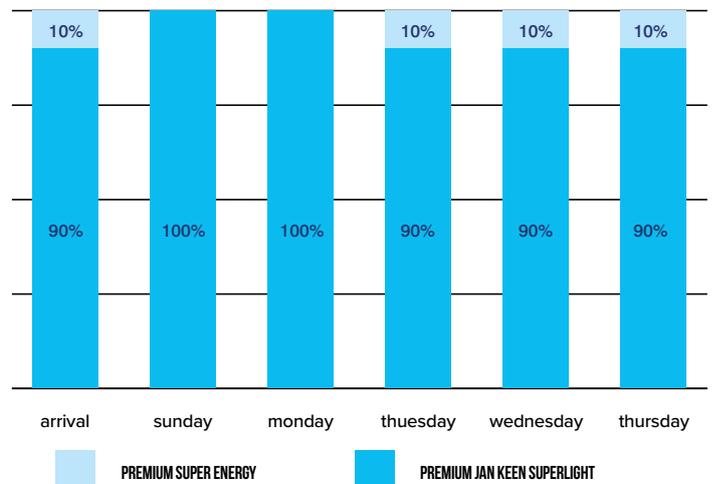

Focus Long Distance and Heavy Long Distance

- 1 **Speed** (weekly with 1 night in basket, < 250 km)
- 2 **Short Middle Distance** (old - youngsters, 2 nights in

basket, > 250 km & < 500 km)

- Heavy Middle Distance (2 or 3 nights in basket, > 550 km)

On homecoming and at least three days prior to the basketing day, the pigeons receive a supplement in the form of a handful of **BEYERS PREMIUM SUPER ENERGY**. For heavy/overnight flights (> 900 km), the pigeons are fed up in the same way after basketing. **BEYERS ORIGINAL TRAPPING MIXTURE**, a feed containing many oily and high fat-content seeds and grains, is an ideal supplement to use during the flight season, either to reward the birds or lure them.

The programme pigeons go into the basket every week, throughout the entire season, but there is an exception after they have undergone a very heavy flight, when they get week of rest. The pigeons train twice daily for forty-five minutes. They always eat before training. The long-distance pigeons are entered in short sprint (vitesse) and mid distance races,

and they do one-day flights. Most of the long-distance pigeons complete as many as five big challenges.

The widow pigeons who stay home to welcome the partner get 100% **BEYERS PREMIUM JAN KEEN SUPERLIGHT**. They are also let out daily for training.

The young pigeons stay under a blackout and have supplementary lighting. The feeding method is the same as for the older pigeons, that is if the young birds are not being fed for training. From the third flight, the young generation pigeons are also entered using the sliding door system. After the young pigeon programme, they are sometimes entered in the 'after season' races (held after the programme season), and occasionally they are not.

BEYERS PREMIUM SUPER ENERGY

- A high-quality and energy rich mix as supplement during the racing season.
- Provides the pigeons with extra energy in preparation of long distances.
- Added the last feeds before basketing. The number of feeds depends on the difficulty and distance of the race.
