

ON THE ROAD TO SUCCESS!

PREPARATION FOR THE RACING SEASON .

FROM WEANING, AND SCOUTING, UNTIL THEIR FIRST FLIGHTS.

Young pigeons grow from a tiny nestling into a young pigeon in a short span of time. Weaning young pigeons usually occurs at around 22 to 25 days. The growth process is certainly not complete by then. They still have to grow into young adult pigeons. That demands a lot from their metabolism. That is why a cereal mix with **highly digestible proteins (= building blocks)** is definitely not an unnecessary luxury after weaning. Feeding a high-quality **BEYERS breeding mix** in sufficient quantities for \pm 5 to 6 weeks is the most appropriate support. You do not have to worry about feeding too much fat during this stage of the growth cycle and the significant period leading up to the start of the racing season. They can handle the first young down moult best when they have a fat and protein rich mixture.

Depending on the program, the desired **peak in condition** and the **the timing you plan for your young bird training** you can build up training intensity by feeding your birds a lighter mix (i.e. adding more crude fibre). Do not feed smaller quantities. It is better to add extra fibre, which means more carbohydrates and less fat, and that will increase their desire for training. As the duration of the training flights increases, we gradually provide more fats to provide the required energy. Playing with the **balance of carbohydrates to fats**.

For this period (from about 5 to 6 weeks up to 2 weeks before young bird training), **BEYERS** has some versatile and quality mixes (**light, protein poor and with sufficient carbohydrates**) that, in combination with a **BEYERS** breeding mix (richer in protein and fat), provide that balance of carbohydrate and fats perfectly.

From 2 weeks before young bird training, we recommend replacing the breeding mix with a racing mix to facilitate the transition to the racing season. Just before the start of the racing season, you can switch to one of our sport mixes with an appropriate feed schedule.

PERIOD	MIXTURES	PREMIUM	GALAXY	ENZYMIX
Up to \pm 5-6 weeks after weaning:	100% breeding mixture	100% PREMIUM SUPER BREEDING	100% GALAXY BREEDING	100% ENZYMIX 7/40 MS STARTER
When the young pigeons begin to moult their baby feathers, you can add a moulting mixture until they are back in plumage.	50% breeding mixture + 50 % moulting mixture	50% PREMIUM SUPER BREEDING + 50 % PREMIUM SUPER MOULTING	50% GALAXY BREEDING + 50% GALAXY MOULTING	50% ENZYMIX 7/40 MS STARTER + 50% ENZYMIX 7/60 MS MOULTING METHIONINE
From \pm 5-6 weeks after weaning up to 2 weeks before young bird training:	50% breeding mixture + 50% lighter and carbohydrate rich mixture	50% PREMIUM SUPER BREEDING + 50% PREMIUM VANDENABEELE	50% GALAXY BREEDING + 50% PREMIUM VANDENABEELE	50% ENZYMIX 7/40 MS STARTER + 50% ENZYMIX 7/48 MS RECUP
From 2 weeks before young bird training:	50% racing mixture + 50% lighter and carbohydrate rich mixture	50% PREMIUM YOUNGSTERS + 50% PREMIUM VANDENABEELE	50% GALAXY SPORT LIGHT + 50% PREMIUM VANDENABEELE	50% ENZYMIX 7/43 MS BUILD-UP EXTRA + 50% ENZYMIX 7/48 MS RECUP

BEYERS PREMIUM SUPER BREEDING - 20 KG

- Contains top quality ingredients, like with small Cribbs maize and toasted soyaas a source of easily digestible proteins, with optimal nutritional value. All this guarantees optimal absorption of the mixture.
- Specifically tailored to pigeons' needs during the breeding period.

Ingredients: small cribbs maize, toasted soya, white wheat, white dari, extra red sorghum, small green peas, small yellow peas, safflower, maple peas, dun peas, popmaize maize, vetches, winter peas, katjang idjoe, buckwheat, lentils

Carbohydrates	56,0 %
Crude protein	10,7 %
Crude fat	8,5 %

BEYERS PREMIUM VANDENABEELE - 20 KG

- Easily digestible and low-protein racing mixture, rich in carbohydrates and fats
- High-value grains (paddy-dari-safflower) and high content of small cribbs maize

Ingredients: small cribbs maize, paddy rice, extra white dari, safflower, kadjang idjoe, white wheat, extra red sorghum, peeled oats, barley, rapeseed, linseed, buckwheat

Carbohydrates	50,7 %
Crude protein	14,5 %
Crude fat	10,6 %

BEYERS PREMIUM YOUNGSTERS - 20 KG

- A combination of grains and seeds that young pigeons, from \pm 5-6 weeks after weaning, need in order to be able to grow into young adult pigeons during their first year of life.
- A mixture with highly utilisable proteins (= building blocks) for optimal further development of the skeleton, muscles and feathers. This in combination with a perfect balance between carbohydrates and fats to increase the appetite for training and also to provide the necessary energy for these training flights.
- As a sports mixture for young pigeons ideal for the last feedings before basketing for flights of up to 6 hours, this in combination with **PREMIUM VANDENABEELE** or **PREMIUM WAL ZOONTJENS YELLOW** at the beginning of the week.

Ingredients: Extra white dari, maize small cribbs, safflower seed, paddy rice, sorghum red, wheat white, hempseed, maize merino, toasted soya beans, vetches, small green peas, trappers, mungbeans, sunflower seed peeled, rape seed black, linseed, oats peeled, peeled barley, buckwheat, dunpeas, maple peas, lentils, brown rice.

Carbohydrates	54,2 %
Crude protein	12,5 %
Crude fat	10,9 %

BEYERS GALAXY SPORT LIGHT - 20 KG

- Easily digestible and highly energetic sports mixture, ideal for flights of < 400 km
- Basis of paddy-dari-safflower supplemented with 4 different types of maize, fat-rich seeds and grains
- Perfect balance of proteins, prevents a slump after some 7 flights

Ingredients: white sorghum, paddy rice, safflower, small cribbs maize, cribbs maize, bordeaux maize, merano maize, whitewheat, peeled oats, peeled barley, peeled sunflower seeds, hempseed, white millet, black rapeseed, kadjang idjoe, canary seed, linseed, vetches, marian thistle.

1000 ML e

HERBA ZYMA

A CONDITION PREPARATION, EXCLUSIVELY MADE FROM NATURAL PRODUCTS AND RICH IN NATURAL MINERALS AND NATURAL LACTIC ACID.

SUPPORT

YEARROUND

- Helps to keep the acidity in the gullet and in the digestive system in balance and thereby supports the pigeon's natural resistance.
- Using Herby Zyma means harmful bacteria will immediately be tackled in the gullet.

Instructions:

5 ml / 2 l of drinking water

- Throughout the entire year: 2 x per week
- During racing season: preferably give the first two days after a race

400 ML e

GARLIC JUICE

GARLIC JUICE

SUPPORT

YEARROUND

- Supports the metabolism and helps to strengthen the natural resistance.
- Has a blood purifying effect.

Instructions:

40 ml / 2 l of drinking water or 1 kg feed

- Throughout the entire year : 1 or 2 per week (during racing season : preferably at the start of the week)

5 KG e

URTICA-CHLORELLA MINERAL MIX

MINERAL MIXTURE WITH TOP QUALITY GRIT, SHELLS, PEBBLE AND CLAY PRODUCTS, SUPPLEMENTED WITH PLANTS AND OILY SEEDS. THE UNIQUE THING ABOUT URTICA CHLORELLA MINERAL MIX IS THE ADDITION OF NETTLE AND CHLORELLA.

SUPPORT

YEARROUND

- The nettle (botanical name = *Urtica dioica*) is well known for its blood purifying and anti-allergic properties. It stimulates the separation of acids and waste products from the muscles. Plus the nettle is also rich in calcium and iron.
- The freshwater algae Chlorella (botanical name = *Chlorella pyrenoidosa*) is well known for its high content of chlorophyll. Dried chlorella has a protein content of 60%. These proteins contribute to your pigeons' muscle development.
- This, combined with the grit and clay products, the small and fat-rich seeds with highly digestible protein content (rape seed black, linseed, safflower seed, sesame seed, mungbeans, ...) have resulted in **URTICA CHLORELLA MINERAL MIX** being a very versatile product, which should form part of your pigeons' daily care and will help you to keep them in top condition.

Instructions:

- During breeding, racing and moulting season : daily up to 10% of the daily ration.
- During periods of rest : daily up to 5% of the daily ration.
