

ON THE ROAD TO SUCCESS!

PREPARATION FOR THE RACING SEASON.

OLD PIGEONS

How do I get my pigeons in good condition after a long winter when they have done little or no training and they are probably overweight? Fats stored in liver and muscles must disperse from the pigeon's body.

It is important that we help our pigeons with specially adapted nutrition that will kick-start the metabolism. Proteins (= building blocks) and fats (= energy) are less necessary now. **Light and protein-poor mixtures with a sufficient filling effect (= crude fibre) and a sufficient amount of carbohydrates**, to allow the pigeons to handle the first (short) training sessions are ideal. If they have that type of feed, the pigeons will get beautiful, pristine chest muscles with good circulation, and they will show more desire for flight spontaneously.

When the duration of training increases, we can provide additional fats by gradually adding **BEYERS** sport mix, before switching completely to one of our sport mixes with the appropriate feed schedule. Ideally, you will wait until just before the start of the racing season.

BEYERS has a range of versatile and balanced high-quality mixes (**light, protein-poor and with sufficient carbohydrates**) and **BEYERS CONDITION & CARE** products that help satisfy the specific needs of pigeons in preparation for the racing season.

Carbohydrates	56,0 %
Crude protein	10,7 %
Crude fat	8,5 %

BEYERS PREMIUM VANDENABEELE - 20 KG

- Easily digestible and low-protein racing mixture, rich in carbohydrates and fats
- High-value grains (paddy-dari-safflower) and high content of small cribs maize

Ingredients: small cribs maize, paddy rice, extra white dari, safflower, kadjang idjoe, white wheat, extra red sorghum, peeled oats, barley, rapeseed, linseed, buckwheat

Carbohydrates	65,8 %
Crude protein	10,8 %
Crude fat	4,6 %

BEYERS ENZYMIX 7/48 MS RECUP - 20 KG

- Low-protein and easy to digest mixture for the racing season
- This is an ideal composition for the promotion of the recovery of the pigeon after a flight
- Contains peeled barley and oats for optimal absorption by reducing the content of fibres

Ingredients: peeled barley, small cribs maize, paddy rice, white wheat, white sorghum, pigeon rice, peeled oats, safflower, extra red sorghum, canary seed, yellow millet, kadjang idjoe.

Carbohydrates	54,2 %
Crude protein	12,5 %
Crude fat	10,9 %

BEYERS GALAXY SPORT LIGHT - 20 KG

- Easily digestible and highly energetic sports mixture, ideal for flights of < 400 km
- Basis of paddy-dari-safflower supplemented with 4 different types of maize, fat-rich seeds and grains
- Perfect balance of proteins, prevents a slump after some 7 flights

Ingredients: white sorghum, paddy rice, safflower, small cribs maize, cribs maize, bordeaux maize, merano maize, whitewheat, peeled oats, peeled barley, peeled sunflower seeds, hempseed, white millet, black rapeseed, kadjang idjoe, canary seed, linseed, vetches, marian thistle.

1000 ML e

HERBA ZYMA

A CONDITION PREPARATION, EXCLUSIVELY MADE FROM NATURAL PRODUCTS AND RICH IN NATURAL MINERALS AND NATURAL LACTIC ACID.

- Helps to keep the acidity in the gullet and in the digestive system in balance and thereby supports the pigeon's natural resistance.
- Using Herby Zyma means harmful bacteria will immediately be tackled in the gullet.

Instructions:

5 ml / 2 l of drinking water

- Throughout the entire year: 2 x per week
- During racing season: preferably give the first two days after a race

URTICA-CHLORELLA MINERAL MIX

MINERAL MIXTURE WITH TOP QUALITY GRIT, SHELLS, PEBBLE AND CLAY PRODUCTS, SUPPLEMENTED WITH PLANTS AND OILY SEEDS. THE UNIQUE THING ABOUT URTICA CHLORELLA MINERAL MIX IS THE ADDITION OF NETTLE AND CHLORELLA.

- The nettle (botanical name = *Urtica dioica*) is well known for its blood purifying and anti-allergic properties. It stimulates the separation of acids and waste products from the muscles. Plus the nettle is also rich in calcium and iron.
- The freshwater algae Chlorella (botanical name = *Chlorella pyrenoidosa*) is well known for its high content of chlorophyll. Dried chlorella has a protein content of 60%. These proteins contribute to your pigeons' muscle development.
- This, combined with the grit and clay products, the small and fat-rich seeds with highly digestible protein content (rape seed black, linseed, safflower seed, sesame seed, mungbeans, ...) have resulted in **URTICA CHLORELLA MINERAL MIX** being a very versatile product, which should form part of your pigeons' daily care and will help you to keep them in top condition.

Instructions:

- During breeding, racing and moulting season : daily up to 10% of the daily ration.
- During periods of rest : daily up to 5% of the daily ration.
